

Spark Modules and Spark Components

41-521 (SM2) ELECTRONIC 0 + 1 OVEN SPARK IGNITION MODULE

The 41-521 Ignition Module (0 + 1) was designed for oven ignition only. Circuits are free-running. A spark is generated for as long as the appropriate input terminal is energized.

Power supply: 120 VAC + 10% - 15%

Voltage output: 14 KV, 50 pf capacitance load

Spark frequency: 2.5 to 4.5 Hz

Spark gap: 1/8" maximum

Ambient temperature: 32°F - 200°F

SPARK MODULES

The Spark Ignition Modules are reliable, solid state electronic controls for energy saving spark ignition. They utilize a high voltage spark discharge to ignite gas for the range-top burners and griddles. The number of burner assemblies and their function determines the type of module used in each range.

Y-54052-KIT, U-67201-20, 41-501

Uni-Line Part No.	Description	Replace these OEM Part No.'s
Y-54052-KIT	Spark Module Kit Model 2+0, 1.37" W x 2.62" L x 1.37" H	See cross-reference at end of Spark Module and Spark Components section
41-501	Spark Module 4+0 Y64450-01	See cross-reference at end of Spark Module and Spark Components section
U-67201-20	Spark module, Model 2+1	See cross-reference at end of Spark Module and Spark Components section

41-552 OVEN ELECTRODE

Provides the spark source in electronic range systems.
