ADD-ON STUFFING BOX KITS AND ADAPTORS

Add-on stuffing box kits are used when an application requires a stuffing box and the replacement control does not have one built-on. These add-on stuffing box kits are designed to fit all capillaries and will fit all sensing bulbs up to 3/8" in diameter. They are designed to convert a standard (non-stuffing box) control to fit a stuffing box application.

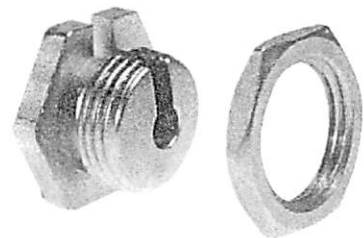

4650-001, 4590-043/044, 4590-173

Uni-Line Part No.	Finish	Application Pipe Size	Application
4650-001	Brass	3/8"	
4650-002	Nickel	3/8"	
4650-011	Nickel	3/8", 1/4"	
4590-043	Brass		Special adaptor fitting can convert 3/8" pipe to 1/4" pipe. This allows installation of a replacement control (that has a 1/4" pipe stuffing box fitting) into an application that was originally 3/8".
4590-044	Nickel		Special adaptor fitting can convert 3/8" pipe to 1/4" pipe. This allows installation of a replacement control (that has a 1/4" pipe stuffing box fitting) into an application that was originally 3/8".
4590-173	Nickel		Special adaptor fitting can convert 1/4" pipe to 3/8" pipe. This allows installation of a replacement control (that has a 3/8" pipe stuffing box fitting) into an application that was originally 1/4".
4650-004	Nickel		Add-on panel nut adaptor kit used when an application requires a panel nut and the replacement control does not have one built-in.

ADD-ON PANEL NUT ADAPTOR KIT

4650-004 Add-On Panel Nuts (nickel plated) are used when an application requires a panel nut and the replacement control does not have one built-in.
