## Canadian Infinite Switches

### 6500 CANADIAN INFINITE CONTROL SWITCHES

The infinite replacement kit is designed to provide universal replacement of original equipment infinite switches and 3, 5, and 7 heat switches. The dial shaft allows the servicemen to use the customer's dial on the replacement switch.

The dial shaft is 2-7/32" in length and may be broken off to the required length. It is factory assembled in the switch.

This switch may be used to replace the dual voltage or flasher type switches IF a new surface element is also installed.

**Electrical rating:** 15 amps at 120 VAC and 240 VAC resistive load.

**6500-208**
